

Environmental Policy

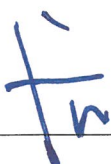

CR Construction Company Limited (“CRC”) is committed to control and maintain a high standard of environmental protection and aims to support environmental protection and to prevent pollution in balance with socio-economic needs as well as to address the needs of a broad range of interested parties.

By application of ISO 14001:2015 requirements and by setting full compliance of statutory requirement as well as contractual obligations as minimum standards, CRC is committed to implementing and maintaining a high-level of environmental management system.

CRC is committed to:

- demonstrating leadership in environmental agenda;
- complying with all relevant environmental regulatory and statutory requirements, contractual requirements with clients and other requirements to which we subscribes;
- preventing environmental pollution including air, noise, water and land;
- minimizing emission of greenhouse gases, energy consumption and water usage;
- avoiding generation of hazardous waste and non-hazardous waste;
- promoting environmental conservation by reducing wastage of raw materials and natural resources;
- exploring opportunities in lifecycle aspects of our products and services to reduce carbon emissions and demonstrate positive environmental outcomes.
- enhancing employees’ environmental awareness through information, instruction and training;
- adopting innovative construction technologies; and
- ensuring availability of information and of necessary resources to implement targeted and measurable monitoring and reporting system for continual improvement.

This policy is communicated to and understood by employees at all levels, including subcontractors and suppliers. This policy is kept under review regularly to satisfy the needs of CRC, its customers and stakeholders.
