

Greenhouse Gas Policy

CR Construction Company Limited (“CRC”) is committed to implementing and maintaining a high standard of greenhouse gas verification system.

By application of ISO 14064:2018 requirements and by setting full compliance of statutory requirement as well as contractual obligations as minimum standards, CRC is committed to implementing and maintaining a high-level of greenhouse gas management system.

CRC acknowledges that its activities have an impact upon the environment and remains committed to a policy of reducing its carbon dioxide and other greenhouse gas emissions.

Through the adoption and implementation of greenhouse gas verification system in managing greenhouse gas emissions, CRC is committed to:

- minimizing greenhouse gas emissions;
- assessing its carbon footprint annually;
- identifying opportunities to reduce CO₂-eq by making its activities more efficient, greener and cleaner;
- looking at options to offset unavoidable emissions using sustainable offsetting technologies;
- allocating clear responsibility for achieving the aims of this policy;
- reviewing targets on a regular basis; and
- encouraging and involve staff to engage in environmental activities.

This policy is aimed at reducing waste, increasing efficiency and identifying savings whilst embedding good environmental management into all of our activities.

This policy is communicated to and understood by all employees, including subcontractors and suppliers. This policy is kept under review regularly to satisfy the needs of CRC, its customers and stakeholders.
