

Waste Management Policy

CR Construction Company Limited (“CRC”) is committed to reduce its impact on the environment by managing its waste in an efficient and sustainable manner.

Each member of CRC and subcontractors shall take responsibility to avoid generation of waste by well planning of works. The following hierarchy of options shall be considered in waste management.

- Reduce** - Avoid generation of waste and discard materials in general.
- Re-use** - Consider passing on materials and equipment to others before disposal.
- Recycle** - Segregate materials for recycling is essential for the reduction of the waste on sit.
- Disposal** - Dispose waste in accordance with statutory and regulatory regulations.
- Goal** - Seek continual improvement in waste management performance by setting appropriate goals and objectives throughout the Company.

Adequate resources and appropriate facilities shall be provided to reduce waste arising from its operations and to implement good waste management practices.

This policy is communicated to and understood by all employees, including subcontractors and suppliers. This policy is kept under review regularly to satisfy the needs of CRC, its customers and stakeholders.
